

UKCP09 Projections in Practice week East Midlands 9 - 12 November 2009

Climate change is the greatest environmental issue we face today. Whilst we must continue to reduce our emissions, we also need to prepare for change which, due to past emissions, is now inevitable.

Following the launch of UK Climate Projections (UKCP09) on 18 June 2009, and to complement national 'Projections in Practice' events, the Government Office for the East Midlands would like to invite you to participate in a week of events hosted in, and tailored to, your region.

The Projections in Practice week is a series of free events, aimed at equipping delegates with the information they need to assess the risk climate change poses to their business or organisation. There are workshop sessions open to all on specific themes, and technical 'hands-on' sessions to learn how to interrogate the data. Full programme>

East Midlands
UKCP09 Projections in Practice week

PROGRAMME OF EVENTS

	9 November 2009	10 November 2009	11 November 2009	12 November 2009
Theme	Business	Local Authorities, LSPs & LRFs	Climate Friendly Communities	Coastal area
